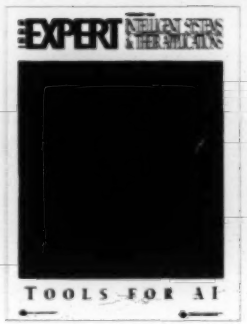
Annual Index, Volume 8, 1993



ARTICLES

AI at Work (CAIA '92)

"AI at Work (CAIA '92): Guest Editors' Introduction," Ian Aikins and Bernadette Kowalski-Minton, August, p. 11.

"Focusing Knowledge-Based Techniques on Market Analysis," Tej Anand and Gary Kahn, August, pp. 19-24.

"Integrating Model-Based and Heuristic Features in a Real-Time Expert System," Monika Pfau-Wagenbauer and Wolfgang Nejdl, August, pp. 12-18.

"A Knowledge-Based Equation Discovery System for Engineering Domains," R. Bharat Rao and Stephen C-Y. Lu, August, pp. 37-42.

"Software Testing with Kitvs," Uwe Nonnemann and John K. Eddy, August, pp. 25-30.

"A Structural and Behavioral Reasoning System for Diagnosing Large-Scale Systems," Robert K. Paasch and Alice M. Agogino, August, pp. 31-36.

AI in Corporate Service and Support

"AI in Corporate Service and Support: Guest Editor's Introduction," Anil Rewari, December, pp. 5-8.

"Building a Case-Based Help Desk Application," Mark Kriegsman and Ralph Barletta, December, pp. 18-26.

"Extracting Knowledge from Diagnostic Databases," Ramasamy Uthurusamy, Linda G. Means, Kurt S. Godden, and Steven L. Lytinen, December, pp. 27-38.

"Integrating Natural Language Processing and Information Retrieval in a Troubleshooting Help Desk," Peter G. Anick, December, pp. 9-17.

AI in Text-Based Information Retrieval

"AI in Text-Based Information Retrieval: Guest Editor's Introduction," Dik L. Lee and W. Bruce Croft, April, pp. 6-7.

"Generating, Integrating, and Activating Thesauri for Concept-Based Document Retrieval," Hsinchun Chen, Kevin J. Lynch, Koushik Basu, and Tobun Dorbin Ng, April, pp. 25-34.

"Knowledge-Based and Statistical Approaches to Text Retrieval," W. Bruce Croft, April, pp. 8-12.

"Knowledge-Based Document Filing," Silvano Pozzi and Augusto Celentano, October, pp. 34-45.

"A Unified Approach to Automatic Indexing and Information Retrieval," Allen Ginsberg, October, pp. 46-56.

"Using Statistical Methods to Improve Knowledge-Based News Categorization," Paul S. Jacobs, April, pp. 13-23.

Functional Reasoning and Functional Modeling

"Functional Representation and Reasoning About the F/A-18 Aircraft Fuel System," Mahmoud Pegah, Jon Sticklen, and William Bond, April, pp. 65-71.

Genetic Algorithms

"Genetic Algorithms: Guest Editor's Introduction," John J. Grefenstette, October, pp. 5-8.

"Managing Genetic Search in Job Shop Scheduling," Serdar Uckun, Sugato Bagchi, Kazuhiko Kawamura, and Yutaka Miyabe, October, pp. 15-24.

"Test And Evaluation by Genetic Algorithms," Alan C. Schultz, John J. Grefenstette, and Kenneth A. De Jong, October, pp. 9-14.

"Training Product Unit Neural Networks with Genetic Algorithms," David J. Janson and James F. Frenzel, October, pp. 26-33.

Knowledge-Based Diagnosis in Process Engineering

"Diagnosing Dynamic Faults Using Modular Neural Nets," James A. Leonard and Mark A. Kramer, April, pp. 44-53.

"Qualitative Interpretation of Sensor Patterns," James R. Whiteley and James F. Davis, April, pp. 54-63.

Knowledge-Based Software Engineering

"Developing Formal Specifications from Informal Requirements," W. Lewis Johnson, Kevin M. Benner, and David R. Harris, August, pp. 82-90.

Machine Learning

"Applying Machine Learning to Semiconductor Manufacturing," Keki B. Irani, Jie Cheng, Usama M. Fayyad, and Zhaogang Qian, February, pp. 41-47.

"Self-Modeling Databases: Learning and Applying Partial Integrity Constraints to Detect Database Errors," Jeffrey C. Schlimmer, April, pp. 35-43.

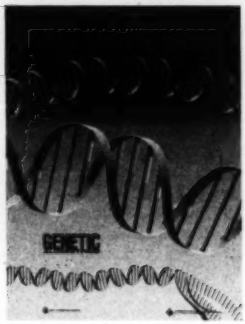
Special Feature

"Applying AI Clustering to Engineering Tasks," Doug Fisher, Ling Xu, James R. Carnes, Yoram Reich, Steven J. Fenves, Jason Chen, Richard Shiavi, Gautam Biswas, and Jerry Weinberg, December, pp. 51-60.

"Building Blocks for Computer Vision Systems," Philip Kahn, December, pp. 40-50.

"A Comparison of Neural Net Simulators," Ottmar Lutzy and Andreas Dengel, August, pp. 43-51.

"Diamon: A Model-Based Troubleshooter Based on Qualitative Reasoning," Franz Lackinger and Wolfgang Nejdl, February, pp. 33-40.



EXPERT
INTELLIGENT SYSTEMS & THEIR APPLICATIONS
APPLYING NEW TECHNOLOGIES TO A FAMILIAR CALL FOR HELP
AI IN CORPORATE SERVICE & SUPPORT

"Extending Component Connection Modeling for Analyzing Complex Physical Systems," Gautam Biswas, Stefanos Manganaris, and Xudong Yu, February, pp. 48-57.
"Formal Minds and Biological Brains: AI and Edelman's Extended Theory of Neuronal Group Selection," Paul F.M.J. Verschure, October, pp. 66-75.
"Implementing KADS Expertise Models with Model-K," Angi Voß and Werner Karbach, August, pp. 74-81.
"Integrating Sets, Rules, and Data in an Object-Oriented Environment," Bogdan Czejdo, Christoph F. Eick, and Malcom Taylor, February, pp. 59-66.
"Integrated Mobile-Robot Design: Winning the AAAI '92 Robot Competition," David Kortenkamp, Marcus Huber, Charles Cohen, Ulrich Raschke, Clint Bidlack, Clare Bates Congdon, Frank Koss, and Terry Weymouth, August, pp. 61-73.
"Interactive Verification of Knowledge-Based Systems," Musa Jafar and A. Terry Bahill, February, pp. 25-32.
"Net-Based Computational Models of Knowledge-Processing Systems," Abhijit Chaudhury, Dan C. Marinescu, and Andrew Whinston, April, pp. 79-86.
"Optimized Rule Induction," Sholom M. Weiss and Nitin Indurkhya, December, pp. 61-69.
"Pattern Recognition: Neural Networks in Perspective," DeLiang Wang, August, pp. 52-60.
"The Reliability of Embedded AI Systems," Farokh B. Bastani and Ing-Ray Chen, April, pp. 72-78.
"A Supervision Support System for Industrial Processes," Jean Michel Penalva, Laurent Coudouneau, Lydie Leyval, and Jacky Montmain, October, pp. 57-65.

The Soar Architecture

"Acquiring Knowledge in Soar," Gregg R. Yost, June, pp. 26-34.
"Combining Multiple Knowledge Sources in an Integrated Intelligent System," David M. Steier, Richard L. Lewis, Jill Fain Lehman, and Anna L. Zacherl, June, pp. 35-44.
"The Soar Architecture: Guest Editors' Introduction," Jack W. Smith, David M. Steier, and Todd R. Johnson, June, pp. 13-14.
"A Stratified Approach to Specifying, Designing, and Building Knowledge Systems," Jack W. Smith and Todd R. Johnson, June, pp. 15-25.

Tools for AI

"Knowbel: A Hybrid Tool for Building Expert Systems," John Mylopoulos, Huaiqing Wang, and Bryan Kramer, February, pp. 17-24.
"A Task-Based Methodology for Specifying Expert Systems," John Yen and Jonathan Lee, February, pp. 8-15.
"Tools for AI: Guest Editor's Introduction," Wei-Tek Tsai, February, p. 7.

Validation and Verification of Knowledge-Based Systems

"Can We Formally Specify a Medical Decision Support System?" Paul Krause, John Fox, Mike O'Neil, and Andrzej Glowinski, June, pp. 56-61.
"Validation and Verification of Knowledge-Based Systems: Guest Editor's Introduction — KBS Validation, From Tools to Methodology," Enric Plaza i Cervera, June, pp. 45-47.
"Knowledge Validation: Principles and Practice," Ole Jakob Mengshoel, June, pp. 62-68.
"Two Aspects of the Validation and Verification of Knowledge-Based Systems," Trevor Bench-Capon, Frans Coenen, Hyacinth Nwana, Ray Paton, and Michael Shave, June, pp. 76-81.
"UVT: A Unification-Based Tool for Knowledge Base Verification," Faruk Polat and H. Altay Guvenir, June, pp. 69-75.
"VVT Terminology: A Proposal," Thomas Hoppe and Pedro Meseguer, June, pp. 48-55.

DEPARTMENTS

Conferences

"CAIA '93: Innovative technologies for applications," Peter G. Selfridge, June, pp. 86-87.
"Coming out from under a cloud: AAAI and IAAI '93," B. Chandrasekaran, Kavi Mahesh, and Eleni Stroulia, October, pp. 78-81.
"IJCNN '92," Michael J. Rothman, February, pp. 70-73.
"Intelligent and Cooperative Information Systems," Mike P. Papazoglou and Louis Marinos, August, pp. 93-96.

Editorial

"Learning from the past," B. Chandrasekaran, October, p. 2.

Forum

"Practical AI: Where it's been, and where it is now," Toshinori Munakata, February, pp. 3-5.

Interview

Allen Newell, by B. Chandrasekaran, June, pp. 5-12.

News

"1992 Manufacturing Intelligence Awards," April, p. 90.

"1993 Loebner Prize competition," August, p. 92.
"Adapting to a changing world: An IEEE survey," April, p. 91.
"Administration pushes high-tech initiative," April, p. 87.
"AI researchers win awards," December, pp. 72.
"Anticipating customer and market needs," February, p. 68.
"Auto makers and federal scientists team up to make cleaner cars," December, pp. 74.
"Columbia gets intelligent advice," December, pp. 73.
"Dante to descend again," December, pp. 72.
"Database gathers cross-cultural research interests," February, p. 69.
"Dying by Design," Dale Strok, December, pp. 70-72.
"Expert system for OS/2 developers," December, p.
"Gibbons bets on high tech," Lan Xue, June, pp. 84-85.
"Gov't software available," June, p. 85.
"High-tech trends in the '93 US budget," Dale Strok, February, pp. 67-68.
"How do you process 2,000 job applicants a day? Dale Strok, August, p. 91.
"IAAI picks 1993 winners," June, p. 85.
"IBM builds expert system for OS/2 developers," December, pp. 73.
"IEEE sends technology list to Clinton," April, p. 90.
"JAIR puts AI on-line," October, p. 77.
"'Knowbots'" may manage knowledge of the future," December, pp. 73.
"Lindberg heads HPCC efforts," February, p. 69.
"Neural nets for automated sonar," August, p. 92.
"New HPCC bill introduced," June, p. 85.
"NTTC and NIST cooperate for competitiveness," April, p. 88.
"Perfex offers second opinions," October, p. 76.
"'Pork' grows in US funding," February, p. 68.
"Post office works on stroke extraction," December, pp. 74.
"Robot-in-residence and other smart machines," April, p. 91.
"Robots at the "office," October, p. 76.
"Robots preserve US jobs," December, pp. 73.
"Robots to the rescue," August, p. 92.
"Robots with tentacles," August, p. 92.
"Robots work better when they communicate," October, p. 77.
"Supercomputing news," April, p. 89.
"The art and science of investing," August, p. 92.
"Traffic help from military software," August, p. 91.
"UPS chairman Kent Nelson receives technology award," April, p. 88.
"US, Japan agree to optoelectronics project," April, p. 89.
"Weiss among new AAAI fellows," August, p. 3.

Out of the Lab

"Active information systems: The evolution of expert systems," Avron Barr, August, pp. 2-3.
"Business process reengineering: Where do knowledge-based systems fit?" Jan Aikins, February, p. 2.
"Case-based reasoning and information retrieval: Opportunities for technology sharing," Ralph Barletta, December, pp. 2, 4.
"Knowledge for sale: The advent of industry-specific class libraries," Neena Buck, October, pp. 3-4.
"Knowledge-based systems for the information industry," Phil Hayes, April, p. 4.
"The new integration of business and technology," Neal M. Goldsmith, June, p. 4.

Reviews, Product

"Aion Development System," Katharina Walker Ray, October, pp. 82-86.
"CAD/Chem," James K. McDowell, October, pp. 87-89.
"G2: Two thumbs up...if you've got the cash!" Dean Deeter and Robert Stack, April, pp. 92-94.

Reviews, Book

Active Vision, Gregory Hager, August, pp. 100-101.
Consciousness Reconsidered, Drew McDermott, June, pp. 91-92.
Expert Systems Catalog of Applications, B. Chandrasekaran, August, p. 101.
Made-Up Minds: A Constructivist Approach to Artificial Intelligence, Marco C. Bettoni, December, pp. 76-78.
Zen and *The Art of the Metaobject Protocol*, Kamesh Ramakrishna, April, pp. 97-100.

World

"Knowledge engineering in Esprit," Luc Steels and Brice Lepape, August, pp. 4-10.
"Micromachines in Japan," David Kahaner, February, p. 74.
"Where is the AI in China? High tech in China and Hong Kong," Dale Strok, June, pp. 82-83.
